

Validation of Interruptible Readiness

This validation is for the following location:

Account #:
Property
Address:

Primary Account Contact:

Phone: _____ Ext: _____
Phone: _____ Ext: _____
Fax: _____ Fax: _____
E-Mail: _____

Please review the following statements and indicate which one most accurately describes the interruptible status of this specific energy plant:

- This energy plant's interruptible equipment has been tested on its alternate fuel and was found to perform satisfactorily. The equipment was switched from gas to its alternate fuel on _____(date) and returned to natural gas on _____(date). This plant can operationally curtail its use of natural gas when notified by Washington Gas to interrupt.
- This energy plant's interruptible equipment has been tested on its alternate fuel and was found **not** to perform satisfactorily. This failed test occurred on _____ (date). The equipment will be repaired by October 18th of the current year and test results will be provided to Washington Gas.
- This energy plant's interruptible equipment has been tested on its alternate fuel and was found **not** to perform satisfactorily. This failed test occurred on _____ (date). Equipment repairs can **not** be made by October 18th of the current year. Please contact me regarding an analysis of converting to firm service.
- This energy plant is interruptible operationally but does not maintain alternate fuel capabilities. We will curtail operations immediately when notified by Washington Gas.

All interruptible customers are solely responsible for complying with any Federal, State and Local regulations or permit obligations, including specifically environmental regulations or permit conditions. Washington Gas Light Company has no obligation or ability to verify compliance with such regulations or permit obligations by Interruptible Customers within its service territory.

Please provide the following information if an alternate fuel is used (maintained confidential):

Type of alternate fuel: _____ #2 fuel oil _____ # 6 fuel oil _____ Other (specify) _____
Alternate fuel onsite storage capacity: _____ gallons
Expected full load run time: _____ days

I validate that the above information is accurate and based on the most recent test of the interruptible equipment at the above address:

Plant Manager

Technician Completing Test

Date : _____

Date: _____

Please return completed form to Washington Gas via fax at 703.750.4441

This Validation of Interruptible Readiness form is used for Washington Gas (WG) purposes only. It provides WG the necessary information to assure that interruptible sales and interruptible delivery service customers maintain the operating flexibility to curtail dependency on natural gas when requested by WG. Failure to complete and return this form will indicate an inability to curtail resulting in ineligibility for interruptible rates.
